

Welcome to our AI Performance Rankings page. Here, we evaluate the components based on their AI processing power, measured in TOPS (Tera Operations Per Second) - a critical metric indicating the ...

Comprehensive benchmarking of AI accelerator systems for language model inference. We test different chip configurations, inference software (vLLM vs. SGLang), and measure how performance scales ...

Detailed comparison of AI performance across CPUs, GPUs, and dedicated AI accelerators. Covers key specs like FP64/FP32/FP16/FP8 FLOPS, INT16/INT8/INT4 TOPS, memory bandwidth, and capacity.

In response to this need, this paper introduces AISBench, a performance benchmark for AI server systems. AISBench comprises standardized rules and a test toolkit that has been agreed ...

After shipment volumes of all types of servers peaked in 2020 due to the COVID-19 pandemic and working from home, all categories dropped to normal in the following years.

Inspur NF5488A5 server has set a new AI performance record in the most renowned Resnet50 training task, topping the list of all single server performance.

Here are Aivres AI milestones of 2020. Immediately following NVIDIA's Ampere architecture release at GTC20, Aivres moved to upgrade its AI server suite to support 8 or 16 A100 ...

This ABI Research competitive assessment ranks the top five AI server companies worldwide.

Which GPU is better for Deep Learning?

SAN JOSE, Calif.-- (BUSINESS WIRE)--Aug 4, 2020-- MLPerf, an industry-standard AI benchmark, released its latest results. Inspur NF5488A5 server has set a new AI performance record ...
