With 2 billion kilometers of fiber optic cables installed around the globe, Corning continues to lead the industry in product quality and innovation.

They have the characteristics of low insertion loss, high return loss, bending resistance, and strong stability, which fully meet the requirements of optical connection performance in harsh ...

To be able to judge whether a fiber optic cable plant is good, one does a insertion loss test with a light source and power meter and compares that to an estimate of what is a reasonable loss for that cable ...
