

Arista supports a full range of 400G optical transceivers, Active Optical Cables (AOCs) and Direct Attach Copper cables (DACs) in both OSFP and QSFP-DD form factors.

The NS-QSFP-DD-400G-FR4-S is a high-performance QSFP-DD optical transceiver module designed for 400 Gigabit Ethernet over single-mode fiber. It uses four CWDM optical wavelengths (1271 nm, ...

This guide covers all you need to know about 400G, the technology that supports it, and how it is being used in the marketplace.

Use 400G QSFP-DD SR4 transceivers on the 400G switch and 400G OSFP SR4 transceivers on the 400G switch, connected via MPO Trunk Cables.

For the most demanding environments the 400G routing and switching platforms provide flexibility and choice for large scale cloud, leaf and spine, routing transformation and hyperscale IO intensive ...

Learn how 400G, 800G, 1.6T, and 3.2T optical transceivers--powered by silicon photonics and CPO--are updating AI, cloud, and hyperscale networks.

Use 400G QSFP-DD SR4 transceivers on the 400G switch and 400G OSFP SR4 ...

Experience breakthrough switch performance that delivers high capacity, speed, and efficiency. A new modular chassis design supports high-port-density 400G expansion modules. Get a high ...

Corning's next-gen CPO optical network switches deliver speed and reduce latency leveraged by industry-leading expertise for optimized on-board connectivity.

A practical guide to 400G Ethernet and 400G network interconnections, covering switches, NICs, optical transceivers, and DAC/AOC cabling to help build scalable, high-bandwidth ...

Explore 400G ZR/ZR+ open networking routers and switches for Data Center Interconnect (DCI), 4G/5G backhaul, and broadband aggregation.
