

With Marvell Teralynx 7 at its core, Asterfusion 200G switches achieve blazing-fast sub-500ns latency--perfect for AI/ML, HPC, and NVMe where speed drives results.

Each IO module connects directly to the switch card without adding any oversubscription. All components of the system including the switch card are removable for ease of maintenance and ...

The OmegaCORE 200G/400G/800G Ethernet IP cores are cutting edge solution to the 200G/400G/800G Ethernet application. It supports the Physical Coding Sublayer (PCS) for 64B/66B, ...

We can provide sales of a large number of new or used transmission equipment, servers, communication power systems, routers, base station equipment, switches, SFPs, storage devices, ...

Discover the power of Open Networking with 1-1.6T Open switches. Ideal for public and private cloud data centers of all sizes.

This switch is your next leap forward - a powerful, efficient, and cost-effective way to bring 50G, 200G, and 400G into your rack. Quad-core 2 GHz ARM CPU, dual-redundant power supplies and 4x hot ...

Explore the FS N8510-24CD8D, a future-ready 200G data center switch built for high-density, scalable, and lossless networking. This guide covers specifications, module and cable compatibility, ...

Asterfusion's switches are engineered to deliver this high-bandwidth, low-latency performance, making them the go-to choice for building next-generation network fabrics.

FS 100/200G PicOS®; data center switches with high-performance switch chip provides powerful hardware switching capacity and data center features (supporting stacking, MLAG, PFC, ECN, ...

The Broadcom®; BCM78919 102.4-Tb/s co-packaged optics switch is a high-radix, high-bandwidth network switching device supporting up to 64 &#215; 1.6TbE, 128 &#215; 800GbE, 256 &#215; 400GbE, 512 &#215; ...
