

The Cisco &#174; family of QSFP-DD modules provide the industry's highest bandwidth density while leveraging the backward compatibility to lower-speed QSFP pluggable modules and cables.

Superxon 50GPON Triple OLT transceivers, compliant with QSFPDD MSA, support single-fiber bi-directional data links with multiple TX and RX rates: 49.7664Gbps, 24.8832Gbps, 12.4416Gbps, ...

Designed with high output power, this module is ideal for transmissions ranging from 100G to 400G, including in ROADM systems, enabling simplified and cost-effective networks.

Powered by Greylock and Delphi DSP ASICs, and silicon photonic integrated circuits (PICs) for an optimized co-packaged design with 3D Siliconization. Supports an expansive list of interoperability ...

Systems designed with QSFP-DD ports are backwards compatible to support existing QSFP+, QSFP28, and QSFP56 modules. This provides flexibility for network designs and migrations to next-generation ...

QSFP-DD Interconnect System's 8-lane electrical interface transmits 28G NRZ, 56G PAM-4 and 112G PAM-4, up to 200, 400 or 800 Gbps aggregate. Backwards compatible with QSFP.

Transforme seu data center e prepare-o para o futuro com a linha avan&#231;ada de transceivers &#243;pticos 400Gbps QSFP-DD e cabos AOC/DAC da FonNet Networks / Precision OT.

QSFP-DD provides high-performance computing capability. The QSFP interconnects density is doubled with electrical interface, providing superior thermal and signal integrity.
