

# Compatible Low-Loss Active Optical Modules from Ukrainian Suppliers

To help you choose the best partner, this article will analyze and introduce 10 companies in the optical transceiver industry chain for you.

From low data rates to 800GB, we have compatible, energy ...

Optogama offers design and manufacturing of customized optical components for laser and vision applications with an optimum of coating performance and cost efficiency.

Lfiber designs, manufactures and supplies a broad range of types of optical components, fiber optic modules, micro-optic devices and more. We specialize in the fields of light (photon) transmission, ...

Search for and compare optical components from manufacturers around the world, or for custom jobs we'll match you with an industry expert service provider.

From low data rates to 800GB, we have compatible, energy-efficient modules tested with global standards. Get the quality you need for any application.

Our optical modules feature traditional DPO, low-power LRO, LPO, and Active Loopback designs for testing, and support data rates from 10G up to 1.6T across a wide range of package types.

A guiding light in a hollow-core holds many promising applications like high power delivery without the risk of fiber damage, gas sensors, or extreme low loss guidance in a vacuum.

The LPO MSA develops electrical and optical interoperability specifications for a diversity of high-density networking equipment and pluggable optical modules based on LPO technology

We have had a very positive experience with several Integrated Optics CW laser modules, which we highly recommend for their easy integration and available extensive QC testing.
