

Shop this LG 2-port branch box for Multi F MAX systems. Built for flexible multi-zone refrigerant distribution in compatible A2L installations.

Our building fan distribution boxes are designed to provide stable power supply for ventilator and HVAC systems. With robust construction and efficient performance, they ensure optimal operation in various ...

Rapidly deployable solutions to quickly address hot spots in existing IT environments. These rack-based cooling products are specifically integrated in or on individual rack enclosures to solve inadequate air ...

This article explains what a distribution box does, typical configurations, sizing guidelines, installation considerations, and maintenance tips to help facility owners and homeowners ...

Along with AC and DC fans and heat sinks, thermally conductive adhesives, thermal interface products, heat pipes, and thermoelectric (Peltier) modules are included.

Forced Power VAV: A forced power VAV box utilizes its own fan that delivers the flow at constant volume. The box consists of primary air and secondary air openings.

Available in 16- and 32-module base options, they can be customized to your needs thanks to their modular structure. Suitable for both flush and surface mounting, they adapt effortlessly to different ...

Flex Branch Selector Box Overview The new Flex Branch Selector boxes are packed with Daikin's state of the art technology to deliver precision refrigerant control and high space comfort.

We offer a broad portfolio of fan and blower coil units, as well as variable air volume terminals, designed for quiet, energy-saving operation in a variety of flexible airflow configurations.

The Air Excellent DB816 is designed to radially distribute air from a ventilation unit, minimizing system pressure drop, fan energy use, and sound levels. It is compatible with Aerfoam insulated ducts and ...

Browse power distribution boxes with circuit breaker protection and multiple outlet configurations. Shop durable solutions for construction and emergency use.

Functional design of the intake and exit fan hoods very effectively prevents direct intrusion of falling water and dust. The advantage is that the filter mat does not get so quickly contaminated with dirt ...
