

# Does the Huawei optical switch need configuration

Both the local and remote interfaces do not need to have optical modules installed. The 40GE interface can be connected to four 10GE interfaces on the remote device using a 1-to-4 40GE optical module ...

This text is a guide detailing Basic Command Line Interface (CLI) Commands on Huawei brand switches. It provides step-by-step instructions for users to perform fundamental network configuration ...

As we know, switch stacking deployment has some special requirement or limitation, this blog will share the software version and model requirement in detail on Huawei S Series Switches stack deployment.

For more service configurations, see the Switch Configuration Guide. This document is for switches running V200R003C00 and later. You can run the display version command in the user view to ...

Optical modules are widely used in switches, network interface cards (NICs), routers, and other communication devices. During use, reading optical module information helps understand ...

Huawei CE and S series switches both incorporate an optical module authentication mechanism. On S series switches, authentication is strict and alarm notifications are more visible, ...

This article summarizes several solutions for using optical modules with switches and common problems encountered during usage, along with specific solutions.

On Huawei CloudEngine switches, optics compatibility depends on both the physical module standard (SFP, SFP+, QSFP+, QSFP28, etc.) and the switch's expectations for electrical ...

The basic configuration enables you to log in to the switch using the web system, and the optional configuration enables you to log in to the switch using Telnet or STelnet.

Check whether the optical module is Huawei-certified. If it is not certified by Huawei, replace it with a Huawei certified one. Remove and reinstall the optical module. If this resolves the ...
