

Our SM fixed optical attenuators are fiber connectors that can be attached to an FC/PC or FC/APC SM fiber patch cable. We also offer variable optical attenuators for MM fibers with FC/PC or SMA ...

Shop DigiKey's large in-stock selection of Fiber Optic Attenuators. View inventory, pricing and order now for same day shipping!

FC Fiber Optic Buildout Attenuators. The MEXFOSERV® Fiber Optic Attenuators provide superior performance for all single-mode in-line attenuation requirements. Standard attenuation values are ...

Our male-to-female buildout optical attenuation (Pads) are available across all fiber modes, featuring LC, LC/APC, SC, SC/APC, FC, FC/APC, and ST connector types. Our in-line attenuator is customized to ...

FS fixed and variable fiber optic attenuators with leading attenuating fibers guarantee consistent and stable fiber attenuation (0~60dB) in WDM transmission.

Compatible with FC connectors, which feature a screw-on mechanism for secure and stable connections, these attenuators offer adjustable attenuation levels from 1 dB to 60 dB.

We supply FC fiber optic attenuators from 1dB to 30dB. Our FC fiber optic attenuators are UPC and APC types, FC fiber attenuators are Low Polarization Dependent Loss and a stable and independent ...

FC fiber optic attenuators feature a proprietary type of metal-ion doped fiber which reduces the light signal as it passes through. This method of attenuation allows for higher performance than fiber ...

When a cable end is inserted into the female end, the remaining male end can be connected to the equipment where the cable would otherwise connect directly, but providing the desired signal ...

Attenuator FC Fiber Optic Attenuator is a component installed in a fiber optic transmission system that reduces the power in the optical signal. It is used to limit the optical power received by the ...
