

The steel armored cable featuring two steel strength members with corrugated steel tape, it provides excellent self-supporting function that suitable for any cable deployment in long span distance, in ...

IMG is the largest manufacturer of steel and aluminum armor tape for the wire and cable industry in North America. And through our exclusive partnerships with several companies around the globe, we ...

Features & Benefits Available up to 24 fibre count in either single-mode or multi-mode optical fibres Steel tape adds to crush resistance as well as can be used as a cable locator after installation ...

Direct buried and/or duct type installation with highly reliable and industrial applications. Designed for outside application and also it's designed to protect optical fiber for the unexpected mechanical and ...

We have our own 3 factory with more than 300 workers and more than 20000 designs of cable, We have advanced production equipment to meet your high or special requirements.

This armored fiber optic cable is constructed with stranded loose tubes for fiber flexibility, steel tape armor for mechanical protection, and steel wire reinforcements for high tensile strength.

The Steel-Tape Armored Unitube is suitable for direct burial applications and other campus backbone environments where the cable may be subject to mechanical crush and impact.

Corrugated Steel Tape (CST) Armored Cables - DX-Series Distribution Cable series. Ideal for installation where direct burial or rodent protection is required.

Fiber Optic Cable Types Fiber optic cable is designed to transmit data using light signals instead of electricity, making it faster, more secure, and immune to electromagnetic interference compared to ...

The steel-armor is easily removed with an internal ripcord, leaving a fully functional intact riser-rated inner cable with original cable markings for identification
