

Flame-retardant PDU power distribution units for power systems

These products are designed to meet the specific requirements of the project, ensuring cleaner, more reliable, safe, professional, and aesthetically pleasing power distribution.

Walther Electric welcomes the opportunity to manufacture custom power distribution systems (PDS) built to your requirements. Our application engineers are ready & willing to provide assistance and ...

Flame-Retardant PC Protection: The outer body integrates high-temperature resistant PC materials, ensuring zero compromise on fire safety even during long-term heavy loads.

Designed to withstand the rigors of varying environments, this PDU provides reliable and safe power distribution, making it an ideal choice for data centers.

Our Power Distribution Units (PDU) provide advanced load balancing, surge protection and spike protection per MIL-STD-1275C-E or MIL-STD-704A-F, and are expertly constructed to ...

Energy Technologies" forte is the design and manufacture of rugged, high reliability products for critical applications in both normal and hostile environments.

THERMOLENE® sets new standards in fire protection. Our specially developed material is flame-retardant and self-extinguishing - essential properties for electrical applications. It meets the strictest ...

Each Metered PDU has a digital LCD meter for real-time load monitoring. Series features include durable metal housing, horizontal/vertical mounting, switch-free design, network-grade plugs and ...

Our innovative power distribution units and rack PDUs not only maintain power, but they also enable us to support you in any challenges your IT infrastructure might face.

We provide intelligent power distribution units, energy efficiency management systems and overall solutions for data centers, rail transit, communication industry, educational institutions, financial ...
