

Galvanized cable tray jumper wire matching

Bonding Jumper, 4/0 AWG Copper Wire Size, 14-1/2 Inch Length, For Use With Cable Tray

If an EGC cable is installed in or on a cable tray, it should be bonded to each or alternate cable tray sections via grounding clamps (this is not required by the NEC^{#174}; but it is a desirable practice).

Metallic cable trays shall be bonded to building steel and earth as supplemental grounding for ground fault protection and signal grounding ("noise" prevention).

Tray-rated cables are required for cable tray installation, so using a channel cable tray system or wire mesh system for exits may be more convenient and economical.

In short, galvanized cable trays require jumper wires. When setting up jumper wires, it is necessary to comply with relevant regulatory requirements, pay attention to fire and moisture prevention issues, ...
