

# How many optical module OEMs are there

Discover the top 10 optical transceiver manufacturers advancing 400G and 800G modules powering hyperscale data centers and next-generation networking infrastructure.

This section provides an overview for optical transceivers as well as their applications and principles. Also, please take a look at the list of 34 optical transceiver manufacturers and their company rankings.

The company offers a wide range of optical transceivers, including CWDM, DWDM, SFP, SFP+, XFP, and QSFP modules, ensuring compliance with major industry standards for Datacom and Telecom ...

Discover the top optical transceiver manufacturers in 2025, including industry leaders like Coherent Corp., Lumentum Holdings, Broadcom Inc., and InnoLight Technology.

Their product range includes various optical modules and systems designed to enhance connectivity and data transfer capabilities, showcasing their expertise in optical communication technology.

The global production of optical transceivers (a subset of optical modules) reached 500 million units in 2022, with a 90% utilization rate in the data center sector.

Cisco Systems, Inc. offers optical transceiver modules used in various networking applications, ranging from campus to data centers to service provider networks. Its pluggable optics innovation, ...

The industry is moving towards using 1.6T modules primarily for model training, while 800G modules, which are currently heavily used for training, are expected to be more focused on ...

Market projections say silicon photonics will hit 30% penetration in 800G modules by 2025 and 50% in 1.6T modules not long after. That could really shake up the optical transceiver ...

To help you choose the best partner, this article will analyze and introduce 10 companies in the optical transceiver industry chain for you.
