

MS1-U05L is an unmanaged industrial switch used to expand ethernet networks in factory floors and for high demanding environments with simple requirements and limited space.

Our Stratix® 2000 Unmanaged Ethernet Switches are ideal for small control networks. Our Stratix® 5400 Industrial Ethernet Managed Switches support layer 2 switching and layer 3 routing in a high ...

Our Ethernet switches are designed for use in industrial environments. They are robust, impact-resistant and temperature-resistant. All products fulfil the highest requirements for reliable and flexible ...

At HoweVision, we design switches that just work. Perfect for factories, warehouses, and outdoor sites, our switches are engineered for reliability under pressure.

industrial Unmanaged switches built for factories and outdoor networks. Withstand extreme temperatures and electromagnetic interference.

Unmanaged switches play a critical role in OT networks. Learn how they affect reliability, scalability, troubleshooting, and cybersecurity on the plant floor.

Designed for harsh environments, these rugged switches feature fanless operation, extended temperature support (-40°C to 75°C), and robust metal enclosures, making them ideal for factory ...

Managed vs unmanaged industrial switches explained with real use cases, costs & expert tips. Discover the best choice for your plant network today.

As factory automation continues to evolve with increasing reliance on real-time data exchange between machines, controllers, and monitoring systems, the need for simple, durable, and ...

If your network is small, stable, and does not require monitoring or traffic control, an unmanaged switch will deliver a simple, cost-effective solution. However, if you need high levels of ...
