

Intelligent control line controls the distribution box

Solutions for smart low voltage electrical distribution Digital technologies such as Cloud Computing, Big Data, Internet of Things (IoT), Artificial Intelligence (AI) and Industry 4.0 are phenomenon which are ...

These applications accurately monitor the grid and remotely control stations to ensure high reliability of supply and improve system performance, using several intelligent functions.

The V1400X-IDL Intelligent Distribution Line Control from Vicon is a device designed to facilitate and automate the management and control of your Vicon control/matrix system and stations.

Motor control centres provide monitoring and control for the operation of a collection of electrical loads. When integrated with communications and smart devices, this equipment becomes ...

In case of line failure, the power supply cannot be cut off in a timely manner, which may result in major incidents. The Intelligent Remote Distribution Box Monitoring Solution is provided to help you analyze ...

Real-time Monitoring and Control: Implement a real-time monitoring system to track electrical parameters such as current, voltage power consumption, and temperature incorporate an intelligent ...

This manual covers the installation and operation of the Vicon V1400X-IDL Intelligent Distribution Line Control (IDL). The V1400X-IDL will be referred to as the IDL throughout this manual.

Electric load management through continuous monitoring and intelligent controlling has become a pressing requirement, particularly in light of rising electrical energy costs.

Hitachi Energy"s PSF640 is designed for the protection, control, measurement, and supervision of utility distribution substations and industrial power systems feeders.

Upgrade outdated vertical operating pipes with our automated air brake switch, motor, and intelligent controls. Our distribution automation solutions enable consistent open-and-close operation for longer ...
