

Digitalising our energy system will ensure we can support competitive markets, seize economic opportunities, and capitalise on new low carbon technologies. The government presents this strategy...

Every investment through the Smart Energy Plan - from smart meters to substations - makes the grid more resilient and reliable. As we move forward in 2024 and beyond, each new ...

Over the past 2 years, the implementation of the EU Action Plan on the Digitalisation of the Energy System has been a key driver of the twin green and digital transitions in the EU energy ...

The digitalising energy action plan highlights how new technologies can help improve the efficient use of energy resources, facilitate the deployment of renewables and optimise the energy ...

This green and digital transition will be successful if the smarter and more connected energy system will support consumers to activate their distributed flexibility potential and reward them.

It highlights how new technologies can help improve the efficient use of energy resources, facilitate the deployment of renewables and optimise the energy system integration while saving energy and costs ...

Realizing these shifts requires optimizing four key areas of grid management: planning, permitting, operations and reliability, and resilience. AI has the potential to significantly improve all these areas ...

Digitalisation Strategy and Action Plan (DSAP) in July 2024. This reflected our growing role in data and digitalisation as well as our commitment to transparency and leadership in this space.

Several countries and regions have recently put forward strategies and action plans to facilitate the digital transformation of their energy systems, while others are beginning to mandate the use of ...

These are called Smart Energy Action Plans (SMEAPs), which provide personalised recommendations on ways to access smart energy offers based on a person's capabilities and ...

Since 2022, CSE has been pioneering the Smart Energy Action Plan (SMEAPS) service, through which we deliver tailored advice for vulnerable customers to help ensure they are not excluded from this ...

President Trump launched "Winning the Race: America's AI Action Plan" in July 2025 to address energy bottlenecks to AI supremacy by streamlining permitting for energy infrastructure,...

The plan, as detailed by BPC, covers expanding energy generation and grid capacity, accelerating the

construction of data centers and ...
