

Protection relay tester which offers all the characteristics and functions needed for protective relay testing, in a manual or automatic mode, designed for maximum efficiency, flexibility and simplicity, ...

It can not only test various traditional relays and protection devices, but also test various modern microcomputer protection, especially for transformer differential power protection and standby ...

Adopt reasonable design of heat dissipation structure, and have reliable and perfect protection measures, soft start of power supply, and certain fault self diagnosis and locking function.

Auxiliary DC source: 220VDC/110VDC automatically output simultaneously, can be used to protect power supply, without the need to set and adjust the software. Power: single channel not less than 110VA.

It can test not only various traditional relays and protection devices, but also various modern microcomputer protections, especially for transformer differential protection and standby automatic ...

Reliably working protection relays are key in modern energy systems. Read on to learn about best practices, challenges, and trends in protection testing.

Our relay protection tester offers comprehensive testing for both optical digital and traditional protective devices. It's ideal for power plants, substations, equipment manufacturers, and institutions needing ...

Find your protection relay testing device easily amongst the 72 products from the leading brands (MEGGER, OMICRON, WUHV, ...) on DirectIndustry, the industry specialist for your professional ...

KFA310 enables comprehensive and precise testing of solar PV systems -- from POI protection relays and anti-islanding functions to inverter grid-support and power quality devices -- ensuring safe, ...
