

Specialized Optical Coupling (index matching) Liquids that closely match the refractive index of common materials (Fused Silica, BK 7 and Water) at given wavelengths. Please contact our technical ...

Large inventory of fiber optic connectors, adapters, fusion splice protection sleeves, adapter dust caps, connector boots from Corning, 3M, AFL, FITEL and other leading manufacturers.

Index matching fluids are liquid substances engineered to possess a specific refractive index, typically chosen to match the refractive index of optical components (e.g., optical fibers, lenses or crystals) ...

Norland Index Matching Liquid (IML) 150 is a low viscosity liquid monomer used as an index matching media for temporary fiber slicing. Unlike silicone index matching liquids which are difficult to ...

Index matching gel (e.g. Refractive Index=1.46) can be used to fill the Connector or Splice Housing gap between fibers. protects the joint and provides mechanical strength Gap Width

There are several different ways to reduce reflection and insertion loss between fiber optic components. One of the quickest and most reliable ways is to utilize an index matching fluid or index matching ...

IMG refers to a silicone-based gel designed to enhance the performance of mechanical splices and NENP connectors. The gel is formulated to have an index of refraction (IOR) which closely matches ...

They are easy to use, providing a quick solution when performing emergency fiber optic splicing. Each splice comes preloaded with Thorlabs" G608N3 index matching gel that provides an overall typical ...

Matching Gel helps to reduce optical loss within fiber optic mechanical splices and connectors, apply optical couplant at the interface of the two mated fibers. This minimizes loss by reducing the ...

To reduce optical loss within fiber optic mechanical splices and connectors, apply optical couplant (matching gel) at the interface of the two mated fibers. This minimizes loss by reducing the difference ...
