

Precise fiber optic stripping matters. See trueCABLE's 3-hole Fiber Optic Stripper features, safe use tips, and step-by-step guide for flawless terminations.

A mode stripper is a device used to remove high-order modes in a multimode fiber, allowing for standard measurement conditions. It is commonly used in the cable industry to ensure that cables are ...

These fiber buffer stripping tools provide a quick, easy, and reliable way to remove the buffer from an optical fiber in preparation for connectorization. A fiber guide and matched blades ensure that the ...

Good fiber optic stripping techniques in your cable assembly process are crucial. See best practices for how to strip fiber optic cable buffers & jackets.

Designed to slit and ring fiber optic cables from 1.2 mm to 7.5 mm (0.05" to 0.3") in diameter, this cable slit and ring tool is perfect for slitting and ringing cables, buffer tubes, and jackets on fiber optic cables.

Discover the critical role of fiber strippers in maintaining cable integrity, splicing quality, and minimizing signal loss. Learn key features for selection, compatibility considerations, ergonomic ...

The mode stripper ensures that the beam profile looks perfect at the fiber output. The removed cladding modes are converted into the heat in the connector body. If, in this case, the connector is not ...

Our cutting-edge fiber stripping equipment is specifically designed for fiber optic coating removal, and we offer a comprehensive range of options. Discover our proven line of high-strength thermal ...

FiberBridge Photonics offers cladding light strippers for single mode, large mode area and multi-mode fibers as well as polarization maintaining (PM) fibers.

The proven Burst Technology(TM) method instantly vaporizes the fiber coating. The result is a clean, stripped fiber at substantially higher strength than any mechanical stripping method. The fiber is free ...
