

These modules, including SFP, SFP+, and SFP28, are widely used in enterprise networks, data centers, and carrier-grade deployments to ensure high-speed, reliable connectivity. ...

Features low power consumption for energy efficiency. Offers high performance and stability for consistent usage. Compatible with major brands like BDCOM, ZTE, H3C, and more. Maximum ...

This product need to use in pair and match up with fiber converter and optical Ethernet switch with SFP slot, it can be used in Ethernet, telecom and optical fiber communication and other industries.

SFP transceivers are valued for their flexibility, low power consumption and ability to support both single-mode and multimode fiber, making them ideal for short-range and long-haul optical transport.

FS provides 1/2/4G transceivers modules in SFP form factor, supporting transmission distances from 100m to 120km over SMF/MMF fiber and enabling low power and cost-effective connectivity solutions.

LINK-PP LS-SM314G-02C SFP 4G Duplex LC SMF Optical Transceiver Module (SMF, 1310nm, 2km,DOM) Take advantage of our testing program to evaluate the reliability and performance of our ...

Choosing low-power optical modules today is one of the simplest, lowest-risk ways to reduce OPEX and improve sustainability without changing architecture or vendor lock-ins.

The diagnostic information with internal calibration or external calibration all are implemented, including received power monitoring, transmitted power monitoring, bias current monitoring, supply voltage ...

The JS-SM551G-A6C SFP transceivers are high performance, cost effective modules supporting data rate of 1.25Gbps and 160km transmission distance with SMF. The transceiver consists of three ...

Achieve seamless connectivity with our wide range of high-performance Fiber Optic Transceiver Modules, offering 1-400G optical modules that are 100% compatible with mainstream vendors.
