

Niger Fiber Optic Temperature Sensing Cable

The FN-SSL-3 is a flexible, surface-mounted fiber sensor for strain and temperature monitoring. With two single-mode fibers in a thin tape format, it easily adheres to curved or flat surfaces.

Recognized as a leading developer and manufacturer of fiber optic temperature sensing and partial discharge monitoring products, providing solutions for a multitude of industrial applications.

Fiber optic sensing cable design offers high reliability, accuracy, and quick update times to ensure 24/7 monitoring of the fiber temperature sensor application with no downtime for maintenance.

High-definition temperature sensing based on the natural Rayleigh backscatter in optical fiber delivers a virtually continuous line of temperature measurements with sub-millimeter spatial resolution.

It is the smallest optical sensor in the industry with a dimension of 0.120mm OD offering a fast response time of less than 10ms. With an accuracy of $\pm 0.3^{\circ}\text{C}$ and resolution of 0.01°C , it is designed to meet ...

It covers the Luxtron M-1100 & M-1200 Series System and various probes, including medical-grade, rugged, and high-temperature options. Instructions are provided for measuring temperatures on ...

A fiber optic temperature sensing system uses optical fiber as the sensing medium to detect and measure temperature across a single point, multiple discrete points, or continuously along ...

List of distributed optical fiber sensor companies, manufacturers and suppliers serving Niger

Built for robustness, these cables offer superior rodent protection and versatility for direct burial or aerial installation, enabling precise and rapid measurements across an extensive temperature range from ...

AP Sensing's fiber optic sensor cables enable real-time, precise monitoring of temperature, strain & acoustics in harsh environments with minimal maintenance.
