

Optical Cable Traction Machine Construction Method

Optical cable traction machines are widely used in optical fiber communication, power, and municipal engineering for cable laying and construction. They can lay up to 288-core optical cables in ...

The invention discloses an optical cable tractor capable of preventing pressure and tensile loss and a traction method thereof, and relates to the technical field of optical cable...

A certain amount of plastic pipes can also be pre-laid in the building, and the optical cable can be laid by traction or vacuum method when the optical ...

There are two ways to lash cable to a messenger, the moving reel method and the stationary reel method. In the moving reel method, the reel is moved slowly under the route while the lasher is ...

Therefore, this article has developed an intelligent traction machine suitable for tension line construction. The design scheme includes three modules: data acquisition and processing, data ...

These recommended practices cover all aspects of optical fiber construction and testing from project management, through deployment, to activation and testing. These practices are fundamentally ...

This machine is mainly composed of three parts: engine, gearbox and transmission device. The jaws of the transmission device are opened and closed up and down to make way for the cables to be ...

A certain amount of plastic pipes can also be pre-laid in the building, and the optical cable can be laid by traction or vacuum method when the optical cable is to be laid later.

In fact, there are two methods for aerial optical cables laying: one is "fixed-pulley traction method", including "manual traction method" and "mechanical traction method"; the other is "cable tray moving ...

Optical cable traction machines are widely used in optical fiber communication, power, and municipal engineering for cable laying and construction. They can lay ...

With technology as the primary productivity, Clusterasia Corp offers an efficient, time-saving and labor-saving cable tractor that solves a major problem in cable construction.

During the construction process, the machine always maintains a smooth running cable, without stacking cables, pressing cables, wrong cables, at the same time make the cable unit length under ...
