

The configuration below has individual splitters at a central location, but addresses that are typically not reconfigurable by jumpers, so this configuration is a "distributed" split.

Clearfield leads the way with optical component technologies for PON splitting, C/W division multiplexing and optical circulators. These products are custom built to your unique split ratios, light requirements ...

Amphenol Network Solutions offers a complete line of discrete Optical Splitter Components for a wide range of uses in various optical network designs. The product family includes splitters from 2 to 64 ...

CommScope offers a portfolio of bare and connectorized splitters/couplers in a wide range of styles and split ratios, and splitter modules for inside plant (ISP) and outside plant (OSP) applications that help ...

What is a Fiber Optic Splitter? Fiber optic splitter is a passive optical device used to distribute optical signals, which can divide input optical signals into multiple outputs to meet the fiber ...

Learn how fiber optic splitters work, types (PLC, FBT), and uses in FTTH/data centers. Understand signal splitting, key specs, and how to choose the right splitter.

While the optical splitter handles the distribution, the optical transceivers are the tireless engines powering the data. For network engineers and ISPs, choosing a trusted partner for both ...

Deploying compact FS PLC Splitters to simplify your networks, perfectly fits your PON, EPON, FTTH, etc.

While the optical splitter handles the distribution, the optical transceivers are the tireless engines powering the data. For network engineers ...

PPC Optical Splitters are available for symmetrical splitting into 2, 4, 8, 16, or 32 divisions and can be cascaded to spread out splits into smaller, optimized serving areas.

Learn how to choose the right fiber optic splitter for FTTH and FTTH deployments. Compare PLC splitter ratios, packaging types, and installation options.
