

The GYTA53 optical cable is a high-performance fiber optic cable that offers a wide range of advantages over traditional copper cables. It is designed to withstand harsh environmental ...

Deploy robust fiber networks underground with our GYTA53 Direct Buried Fiber Optic Cable. Featuring a Double Jacket (PE) and Double Armor (Aluminum + Steel) construction, this cable offers superior ...

GYTA53 is an outdoor optical fiber cable designed for direct buried installation. The cable adopts a stranded loose tube structure with gel-filled tubes and core flooding for water blocking.

Deploy robust fiber networks underground with our GYTA53 Direct Buried Fiber ...

GYTA53 Outdoor armored fiber optic cable is with good waterproof, anti-side pressure and tensile properties, suitable for duct and direct buried.

Single Mode GYTA53 Tight Buffer Fiber Optic Cable The GYTA53 cable offers strong connections. You get fast data transfer, reaching speeds of up to 100 Gbps. This features a double jacket design, ...

The GYTA53 cable is double-armored with a polyethylene outer sheath and a corrugated steel tape. This design provides exceptional protection against mechanical stress and environmental ...

GYTA53 optical cable with steel armor: 2-288 core count for direct burial & industrial use. IP68 waterproof, supports 10Gbps transmission--reliable for smart grids, FTTH and 5G backhaul.

Cable protected by a corrugated steel armoring and black PE over sheath for protection against mechanical damage and termite or rodent attack, suitable for direct buried or aerial application.

The GYXTW53 cable features a center tube design with a single loose tube (made of PBT) housing the fibers, surrounded by a waterproof filling compound (gel) to prevent moisture ingress.
