

An optical splitter, also known as a beam splitter or fiber optic splitter, is a device that splits an incoming optical signal into multiple output signals. It is commonly used in fiber optic networks to distribute ...

Discover the perfect addition to your Fiber Optic Equipment with our Optical Splitters. Identify leading distributors by their ability to offer competitive wholesale prices and insider deals on new custom ...

Our Optical Splitter offers exceptional quality within the Fiber Optic Equipment category. When assessing suppliers in China, consider factors like certification, production capacity, and client testimonials.

These splitters are designed for FTTx Passive Optical Networks and are known for their low insertion loss and high return loss, making them ideal for efficient optical signal distribution.

Optical prism designed for precise beam splitting in visible light applications. 50x50mm dimensions with a 1.1mm thickness, ensuring performance and durability. 50/50 split ratio allows for equal distribution ...

High quality 50/50 2x8 Optical Fiber Splitter from China, China's leading product market 50/50 2x8 optical fiber splitter product, with strict quality control 50/50 optical cable splitter factories, producing ...

Designed as passive yet powerful devices, our splitters expertly divide a single optical signal into multiple outputs, ensuring seamless data distribution across your network.

Q1: Is your company a manufacturer or dealer? A1: We have our own factory in Wuhan, China.

Discover beam splitters with competitive pricing, ideal for optical and fiber-optic applications. Explore AR-coated glass and ZnSe options, 50% reflectivity, 3-year warranty.

We offer two different production technique options: adhesive cementing (NOA61) and enhanced optical bonding, ensuring excellent insertion loss and isolation (25-40 dB) for our customers.
