

PVC fireproof and flame-retardant cable trays

Typical applications include basement, tunnel and chemical industry plant for cable engineering.

FireResistant Solutions provides cable tray covering and fire-protection systems designed to safeguard electrical and data infrastructure in commercial and multifamily buildings.

In the simplest sense, the coating transforms a group of cables into one large single cable, covered with a fire retardant jacket. Cable Coating Fire Breaks have been proven to be an effective, dependable ...

Safeguard your infrastructure with our Fire Rated Cable Trays that are engineered to inhibit flame spread and support swift fire response. The shield cables are from moisture, dust, UV radiation, and ...

Basor Electric, sensitive to the need to minimize the consequences of a fire, has subjected its cable trays to rigorous fire resistance tests to ensure the behavior of its products.

Top-quality fire resistant cable tray with N1 fire rating, 5-12 mm fireproof core, superior heat insulation, flame protection, and 60-min fire resistance.

PVC trays are lighter, easier to cut and install, naturally corrosion-resistant, and often more cost-effective. They are also excellent electrical insulators and are available in low-smoke, ...

Fire protection solutions to protect cables, cable trays and cable systems. Discover our tested cable coatings and fire protection bandages!

This guide explains the critical steps in fireproof cable trays acceptance, covering coating processes, inspection standards, and more. By following these steps, you can enhance durability ...

There are several material choices available for cable trays in today's market, the most popular choices are steel (HDG/SS), aluminum, PVC and FRP/GRP. However, there is not a ...
