

The Fiber Optic Cable Puller from Condux sets new standards for safe, accurate pulling of fiber optic cables. Only the Condux puller can offer load cell torque input for the most accurate tension ...

One of the primary standards for FTTH cable tensioners is their mechanical strength. These devices are designed to withstand significant forces during the cable installation process. The tensioner must be ...

Timberland designs and builds a complete range of small and large pullers for fiber-optic applications, including truck- and pole-mounted models. Timberland Equipment fiber-optic pullers provide ...

This precise tension control function is particularly suitable for long-distance power transmission and fiber optic cable laying projects, significantly improving construction safety and quality.

Tension clamps are designed to provide secure and reliable support for fiber optic cables in outdoor and aerial installations. With a combination of stainless steel wire and reinforced nylon body, Fibeye ...

We offer fiber optic materials from Test Equipment, Bulk Cable and Fusion Splicers to Tools, Patch Cables and Consumables.

The Fiber Cable puller is a simple, easy to use cable puller that is designed to accommodate industry standard sheaves of 9", 24", 30" or 40" diameter specifically intended for use with fiber optic cables ...

At Gcabling, we provide a complete set of reliable, corrosion-resistant tension clamp solutions designed to ensure safe and stable cable deployment in overhead networks.

The retainer ensures a maximum variation of 0.5 dB in optical power when subjected to 500 N cable tension at 20°C. This guarantees reliable optical performance for telecom, coaxial, and fiber networks.

Designed for high-performance and reliability, this advanced pulling system uses a load cell torque input system --the only one of its kind--to deliver precise tension measurements unaffected by ...

The Optical Tension Device is designed for pulling OPGW fiber cable to final sag tension. Once the final sag has been achieved, a permanent type dead-end device should be installed promptly, followed by ...
