

Eaton's protective relays provide you with unique microprocessor-based devices that eliminate unnecessary trips, isolate faults, protect motors and breakers, and provide system information to help ...

Cubicles/relay protection and emergency control automation for distribution grids, oil and gas industry, industrial plants and traction substations; Relay protection for MV switchgear units, 6/10/35 kV ;

A fast and selective arc fault mitigation for air-insulated LV & MV switchgear and Relion protection and control relays and sensor technology protect staff and plant facilities for many years.

Discover our range of products in Protection Relays: PowerLogic(TM) P3 Protection Relays, Sepam series 80, Vamp Arc Protection Relay System, PowerLogic(TM) P5 Protection Relays, PowerLogic(TM) A1 and ...

SIPROTEC: Multifunctional protection relays Experience the benchmark in grid protection, automation, and monitoring! SIPROTEC 5, built on extensive field experience, offers comprehensive ...

SEL software offers powerful tools for configuring protective relays, analyzing event reports, and visualizing other power system data. Protect critical components in your power system with a wide ...

Our engineers develop custom relay logic and protection schemes tailored to your specific operational needs. We provide programming, testing, and commissioning support to ensure seamless integration ...

Explore the latest trends in relay protection, including innovations in relay test set technology, the shift to digital relays, and tools like the secondary injection test set. Learn how these ...

Protective relays and devices have been developed over 100 years ago to provide "lastline" of defense for the electrical systems. They are intended to quickly identify a fault and isolate it so the balance of ...

PRS engineers are experts at applying and setting microprocessor-based protective relays for electric power generation, transmission lines, substations, distribution networks, and industrial power systems.
