

Select an air switch for the distribution box

(4) The wiring between the main air switch and each branch air switch inside the box usually goes on the left side, while the wiring for power distribution system outgoing lines usually goes on the right side.

How to choose the type C and D of the circuit breaker (air switch)? There is usually a distribution box somewhere in our home, and a corresponding switch will be installed in the distribution box.

1, the general switch of the household distribution box can generally choose double-pole 32-63A small air switch or isolation switch. 2?Lighting circuits generally use 10-16A small air switches.

Waste Disposal Control Box With Air Switch Button - Unlacquered Brass | Model Number: AS450ULB

It is expected that the socket circuit that uses high-power electrical appliances can use a 20-amp air switch, otherwise a 16-amp air switch will be sufficient.
