

Selection Guide for New Broadcast Transmission-Grade Optical Amplifiers

Optical & Copper Products Semtech designs the industry's most innovative optical, analog and mixed-signal semiconductor solutions to serve the rising global demand for high-speed data transmission ...

The portfolio addresses the analog interfaces between electrical and optical domains providing solutions to meet the demanding size, power and signal integrity requirements of today's high speed networks ...

MAP-Series Selection Guide The VIAVI Multiple Application Platform (MAP) is an optical test and measurement platform optimized for cost-effective development and manufacturing of optical ...

Abstract: Opening new wavelength bands is the most economic step for further increasing the capacity of optical transmission links. Characteristics of different amplifier technologies for signal ...

An optical amplifier can directly amplify an optical signal, without the need for conversion to an electrical signal. It has become an extremely important device that supports long-distance ...

This selection guide seeks to help end-users to identify the amplifier(s) that best suit their application needs by providing an "at a glance" comparison of the specification parameters. The part numbers ...

With advances--such as Ultra HD 4K, video over IP, and multi- channel audio in the broadcasting market--greater demands are being put on data transmission systems and speeds. Many traditional ...

That's why you can depend on the experts at OCC to provide data transmission solutions for every broadcast challenge, including deployable mobile units, permanent infrastructures, 1G-to-10G audio ...

For our optical component and module customers, this highly differentiated set of products provides a unique roadmap that improves performance and reliability, while simplifying design, lowering costs ...

The wide range of supported connectors and signal levels ensures seamless integration into diverse audio environments--from studio-grade recording setups to casual multimedia setups --making the ...

Broadcast performance Low noise figure, wide gain range, high output level, and excellent linearity are essential when amplifiers are used for broadcasting purposes.

Selection Guide for New Broadcast Transmission-Grade Optical Amplifiers
