

Specifications of hot-dip galvanized and cold-dip galvanized cable trays

Once used solely as a means of corrosion protection, hot-dip galvanizing is now specified for many other reasons such as lower cost (initially and over the life-cycle), durability, longevity, ...

1.1 This specification covers the requirements for zinc coating (galvanizing) by the hot-dip process on iron and steel products made from rolled pressed and forged shapes, castings, plates, bars, and strips.

All articles to be galvanized shall be handled in such a manner as to avoid any mechanical damage and to minimise distortion. (See Note 2 above) Design features that may lead to difficulties during ...

This document specifies the requirements for hot-dip galvanized (HDG) steel cable trays with self-healing zinc coating, suitable for electrical cable support systems.

This specification covers the standard requirements for hot-dip galvanized zinc coatings on iron and steel products made from rolled pressed and forged shapes, castings, plates, bars, and ...

1.1 This specification covers the requirements for zinc coating (galvanizing) by the hot-dip process on iron and steel products made from rolled pressed and forged shapes, castings, plates, ...

The specification is designed to comply with CSI format and covers topics such as pre-qualification of galvanizers, coordination of fabrication and galvanizing, ...

For our products the latest issued standards specifications shall apply. Mechanical properties and chemical compositions in the tables are valid taking into account the supplementary specifications of ...

Access comprehensive galvanizing technical resources, ASTM specifications, design guidelines, and engineering documentation. Expert technical support for your projects.

These Specifications are intended for adoption by owners for galvanizing bridges and other highway structures. Unless otherwise noted, all references to galvanizing in these Specifications refer to the ...

Fabricated steel products that are to be galvanized should have details that would allow the galvanizer's cleaning solutions and molten zinc to flow freely through the product at various stages throughout the ...
