

Project Description Client: Sudan Steel Factory Location: Khartoum - Sudan Surface Area: 13200 m² Year Completed: 2008

The mostly combustible cable sheaths and insulation allow a fire to spread along the cable at rapid speed. Our tested solutions for cable fire protection can delay the spread of fire in order to minimise ...

Selecting the appropriate fire protection system for fire resistant cable trays in high-stakes projects--especially in regions like the Middle East with extreme climates and frequent potential for ...

Middle East projects expose cable tray systems to extreme ambient temperatures, intense solar radiation, dust, and--often--coastal corrosion. When fire resistance is required, the ...

Utility tunnel cable systems face critical fire safety challenges due to dense cable arrangements and complex flame spread dynamics. This study investigates the suppression ...

Whether you need certified fireproofing, firestopping, insulation, or photoluminescent safety systems, our team is ready to support your project with rapid response and code-compliant solutions.

By protecting power, control, and communication cables during a fire, fire-resistant cable tray systems help save time, protect passengers, and support safe evacuation and emergency ...

Ladder Cable Tray Ladder Cable Trays are one of the most demanded products listed on the product catalogue of Brilltech. Being a market leader in this segment, Brilltech believes in offering premium ...

The question becomes: can fire protection be added to existing cable trays without replacing the entire system? The answer is often yes, but feasibility depends on access, required EI ...

Selecting the appropriate fire protection system for fire resistant cable trays in high-stakes projects--especially in regions like the Middle East with ...
