

Learn how to extend your home Internet or Wi-Fi to your upstairs when your router is downstairs.

Step 1. Determine Setup Step 2. Determine Port Requirements and Get A Switch Step 3 - Run Ethernet Cables Upstairs Option 3 - Moca The next thing we're going to need to do is to decide how many ethernet ports we'll need so that we know which switch (sometimes called a splitter) to buy. You'll want one port for each cable you are going to run to your house or upstairs in your home. So, if there are 5 rooms in your home that you are going to run cables to, you'll need at least a...
