

What is a smart patch panel

Intelligent Patch Panel LS SimpleWin(TM) Intelligent Infrastructure Management System drastically speeds up and simplifies site planning and daily network provisioning, maintenance and security.

Smart patch panels bridge the gap. By embedding micro-switches, LEDs and RFID-tag sensing directly into each port, they elevate structured cabling from static asset to live dataset.

By equipping patch panels with a means to detect when and where connections are made, it is possible to monitor and record the status of port connections in real time.

Smart patch panels integrate diagnostic capabilities to test the fiber optic link remotely. This enables network administrators to accelerate initial deployment, quickly identify and ...

In practice, an intelligent electronic patch panel would give a network manager the ability to make cross-connections from any circuit in horizontal wiring to any circuit in the backbone subsystem without ...

MapIT G2 integrates the powerful combination of innovative Smart Patch Panels, user-friendly Master Control Panels and EagleEye(TM) software to provide real-time tracking and reporting of network-wide ...

SMARTPATCH is a modular-based system which provides the flexibility and support required to efficiently meet business needs. Operates on multiple network/database platforms and supports ...

FUTURE-PATCH is therefore an intelligent, electronics based solution that allows technicians to be visually guided (LED) on site at the rack when adding or removing patch cords and to directly check ...

This complete & intelligent-ready physical layer management system uses RFID technology for wireless detection of individual patch cords & real-time monitoring of unintended physical changes in network ...

CommScope offers Intelligent Copper Panels for automated infrastructure management solutions that enable you to monitor, manage and optimize your network connectivity in real time
